

Soarnol Asian price increase announcement

At NIPPON GOHSEI, we take pride in providing our customers with highly advanced Soarnol along with intensive technical support in order to meet expanding R&D requirements. Innovation is our priority and this has continued with the recent introduction of our new generation of products. Although Soarnol is a specialty chemical, the production cost has been undermined by the continuous increase of raw material and utility prices.

Consequently, we must proceed with price increase for all Soarnol and related products with effect from March 1, 2011.

1. Area and Increasing Value

Japan	+JPY50/kg
All other Asian countries	+USD0.50/kg

2. Products

Soarnol™, Soaresin™, Soarlite™
