

CERTIFICATE

Recyclability of Packaging Material

Mitsubishi Chemical UK Limited
SoarnoL Division, Soarnol House
Saltend, Kingston upon Hull HU12 8DS | UK

The company receives the certification of recyclability for the following packaging material.

Designation

EVOH, SoarnoL™ with an ethylene content of ≥ 29 mol%

Barrier layer in coextruded polyethylene films, based on LDPE and/or LLDPE.

The film structure must contain maleic anhydride-grafted PE as tie layer specified for EVOH/PE coextrusion in a ratio of ≥ 0.5 g tie layer resin per g EVOH.

Test result

Assessment via path:

Path 1: Plastic films / LDPE

Recyclate (final product):

LDPE Regranulate

Test standard / scope of application:

- ☒ **Requirements and assessment catalogue of the institute cyclos-HTP** for EU-wide certification (state 14/09/2021) / Scope of validity according to nation states, see chapter 1
- ☒ **DIN EN 13430** with regard to material recyclability in the post-use phase; also integrated

The following reference processes, materials and applications are taken into consideration within the certification process:

- Detection as flexible PE packaging in state-of-the-art sorting plants
- Recyclate use for injection moulding and blown film applications
- Test program based on CHI test protocol **CHI-C8-PEF-1/3.0** with the use of PCR-based LDPE recyclate as reference

According to the CHI standard the plastic material is no contaminant in the tested application and in the above-mentioned material combination and can be considered as:

Recycling Compatible for PE Film Recycling

(AT, BE, DE, ES, FR, IT, NL, NO, PT)

This certificate (No. 2488-2022-002773) is valid until the **28/02/2023** (1 year upon issue) for the countries listed above in bold. For the countries shown in *italics*, the existence of a recycling infrastructure cannot be assumed as predominant.

This certificate will lose validity in case of qualitative or quantitative changes of packaging components.

Aachen, dated 23/02/2022 (revised 16/03/2022)
